Developer

A full-time developer with outstanding expertise in leading the end-to-end development of complex applications, leveraging strong skills in PowerApps, Azure DevOps administration, and ASP.NET. Proven ability to optimize processes, innovate solutions, and collaborate effectively with senior leadership to deliver impactful results in healthcare and innovation initiatives.

Experience

Developer (Full-Time)
May 2023 - Present

Fraser Health Authority | Surrey, B.C

- Leading the end-to-end implementation of a PowerApps application focused on tracking Patient Referrals to Mental Health programs leveraging the Power Platform, specifically Power Apps, Power Automate, Data Verse and Dataflow to architect and implement a seamlessly integrated tracking system with best coding standards.
- Collaborating with the executive director and senior directors to create an innovative PowerApps application for problem-solution matching, using an agile approach to gather feedback and make iterative improvements.
- Developing, enhancing and testing features within a patient tracking healthcare system for hospitals using SQL-based databases, C#, JavaScript, HTML, and CSS within the ASP.Net MVC framework, directly contributing to system improvements.
- Ensured smooth operations in Azure DevOps by adding new fields and managing access and permissions.

Developer (Co-op/Casual)
Sep 2021 - Apr 2023

Fraser Health Authority | Surrey, B.C

- Leveraged Agile methodology to drive continuous improvement and effectively manage project organization.
- Ensured the reliability and functionality of new or enhanced features through comprehensive testing, promptly resolving bugs and issues.
- Assisted in development of new features in a healthcare application using Visual Studio IDE and ASP.NET MVC framework, delivering effective solutions to address critical industry requirements.
- Cultivated strong relationships and fostered exceptional collaboration among team members.

High School Tutor
Jan 2018 - Aug 2021

Simon Fraser University | Burnaby, B.C

- Collaborated closely with a team of three tutors to provide comprehensive support to students, helping them gain a deeper understanding of targeted weak areas within specific subjects or the subject as a whole.
- Took charge of planning and orchestrating engaging literacy and numeracy activities for a group of up to 20 students, fostering their academic growth and inspiring students to learn.

Education

B.Sc - Computer Science
2019 - 2022
Simon Fraser University

B.Sc - Biological Science
2013 - 2018
Simon Fraser University
